

# ITEM # CAPEA1818C4, CAPEA - CASSED UPFLOW/DOWNFLOW INDOOR COILS

The Daikin brand All-aluminum CAPE Cased Upflow/Downflow Indoor Coils are made for the Daikin Fit system. This unit features aluminum tubing and corrugated aluminum fin coils and rust resistant, high-temperature, thermoplastic drain pans. The CAPE cabinet is painted nickel gray.

- Electronic Expansion Valve (EEV) models feature:
  - ComfortNet™ communicating system compatible
  - Cooling and heat pump applications
  - Fault recall of six most recent faults
- All-aluminum evaporator coil
- Galvanized

Specifications	
Nominal Capacity	1 1/2 to 2 TR
Coil Configuration	A Coil
Expansion Device	Electronic Expansion Valve
Refrigerant	R-410A
Shipping Weight	45 lb

Dimensions	
Depth	21 in

Width	21 in
Height	18 in
Plenum Opening Width	20 in
Liquid Connection	3/8 in
Suction Connection	3/4 in

## Features

- All-Aluminum evaporator coil
- Optimized for use with R-410A refrigerant
- Some models suitable for use with R-410A or R-22 refrigerant
- Factory-installed electronic expansion valve (EEV) for precise refrigerant control
- Compatibility with Daikin One+ smart thermostat and other Daikin communicating equipment
- Cooling and heat pump applications
- Fault recall of six most recent faults
- Check flowrator for cooling and heat pump applications
- Vertical and horizontal models available
- 21" depth for easier attic access
- CAPEA models include a single front access panel
- Foil-faced insulation covers the internal casing to reduce cabinet condensation
- Galvanized, leather grain-embossed finish
- Rust resistant, thermoplastic drain pans featuring a low water-retention design
- DecaBDE-free thermoplastic drain pan with secondary drain connections
- UV-resistant drain pan
- AHRI certified; ETL listed

## Notes

Do not use these coils on oil furnaces or any applications where the temperature on the drain pan may exceed 300° F. If these coils are applied with an oil furnace or another application where high temperatures threaten or jeopardize the durability of the drain pan, you must replace the factory-installed drain pan with a high-temperature drain pan. High-temperature drain pan kits are available as field-installed accessories.
